Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/644,068

Applicant(s)

NAKAMURA ET AL.

Examiner

Ke Xiao

Art Unit

2629

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 March 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 3 and 4 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 3 and 4 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SE/US)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mizoguchi (US 5,841,466) in view of Iwasa (WO 02/42890) and Okamoto (US 5,465,083).

Regarding **Claims 3 and 4**, Mizoguchi teaches a liquid crystal projector system for regulating use of a liquid crystal projector (Mizoguchi, Fig. 2 element 5), comprising:

an external computer for operating the liquid crystal projector, the external computer being connected to the liquid crystal projector by radio or wire and including liquid crystal projector controlling software for controlling the liquid crystal projector (Mizoguchi, Fig. 3 element 8 and 22);

the liquid crystal projector comprising:

an operation unit for operating the liquid crystal projector, the operation means including means for entering a command to control the liquid crystal project via key entry (Mizoguchi, Fig. 2 element 14, Fig. 4 elements 30-32);

a circuit for registering a password in the liquid crystal projector (Mizoguchi, Fig. 4 element 30);

a determining unit to determining whether a password is registered in the liquid crystal projector in response to a power supply of the liquid crystal projector being turned on (Mizoguchi, Fig. 1 element S3, Fig. 4 element 30);

a circuit for inhibiting operation of the liquid crystal projector by the operation means, as well as for waiting until a password is received from the external computer in response to detecting that the password is registered in the liquid crystal projector (Mizoguchi, Fig. 1 S14-S17, Fig. 4 elements 3, 5 and 30);

a circuit for comparing, in response to receiving the password from the external computer, the received password with the registered password and for allowing operating of the liquid crystal projector by the external computer in response to the means for comparing indicating that both the registered password and the password received from the external computer coincide with each other (Mizoguchi, Fig. 1 S14-S17, Fig. 4 elements 3, 5 and 30); and

a power off operation of the liquid crystal projector wherein the operation of the power key provided in the operation means is never nullified or inhibited (Mizoguchi, Figs. 2 and 4 element 12, the power key is separate from the actual control device it's a hardwire switch which provides power to the entire device thereby it is not nullified by the password system).

Mizoguchi fails to teach a determining circuit to determine a number of times an erroneous password is entered and nullifying operation of keys of the operation unit as claimed.

Iwasa teaches determining a number of times an erroneous password is entered and to inhibit operation of an electronic system in response to determining that the number of times an erroneous password is entered exceeds a predetermined number of times (Iwasa, Fig. 6). It would have been obvious to one of ordinary skill in the art at the time of the invention to add an additional circuit to determine a number of times an erroneous password is entered and to inhibit operation of the display of Mizoguchi in response to determining that the number of times an erroneous password is entered exceeds a predetermined number of times as taught by Iwasa in order to prevent an unauthorized user from guessing at the password repeatedly.

Mizoguchi in view of Iwasa fails to teach nullifying operation of keys of the operation means when the passwords coincide with each other as claimed.

Okamoto teaches nullifying operation of keys of the operation means when the passwords coincide with each other in order to establish a key lock mode (Okamoto, Claim 7). It would have been obvious to one of ordinary skill in the art at the time of the invention to add the key lock mode to nullify operation of the keys for inputting additional passwords as taught by Okamoto to the password input system of Mizoguchi in view of Iwasa in order to prevent erroneous entering of false passwords after the correct password has been entered.

Response to Arguments

Applicant's arguments with respect to claims 3 and 4 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ke Xiao whose telephone number is (571)272-7776. The examiner can normally be reached on Monday through Friday from 8:30AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sumati Lefkowitz can be reached on (571) 272-3638. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
